at the forefront of low power
Wireless Mesh Networking
Technology

Delivering best-in-class ZigBee solutions that span home and building automation, asset tracking, security, energy management and metering

● **Chips** - Choose between the EM250 SoC and EM260 Co-Processor for superb performance and flexibility.

● **Software** - The rigorously tested and field-proven EmberZNet sets the bar for ZigBee stack performance.

● **Tools** - Combining powerful features with unmatched ease of use to help bring ZigBee products to market.
