MICROCHIP

16-Bit Seminars 2007

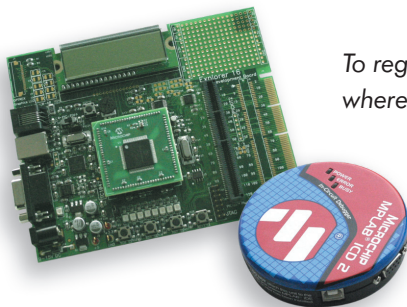

Anglia are pleased to announce that we are holding the following **FREE** one day 16-Bit Seminars, in conjunction with our partner Microchip, in various locations around the UK.

Manchester	5th June
Cambridge	7th June
Birmingham	12th June
Swindon	14th June

These Seminars will focus on Microchip's range of 16-bit microcontrollers. Each Seminar will benefit design engineers who can invest one day with industry professionals where they will be able to discover and evaluate Microchip's innovative MCU product lines.

All attendees will have the opportunity to speak directly to both Microchip and Anglia engineers during the interactive sessions. They will also receive a free evaluation suite which will comprise of an Explorer 16 dev board and an MPLAB® ICD 2 limited edition, together with a PICTail™ module of their choice.

To register for any of these MCU Seminars please visit www.anglia.com/seminars where further details can also be found. Lunch and refreshments will be provided throughout.
