TRIMPOT® TRIMMING POTENTIOMETERS

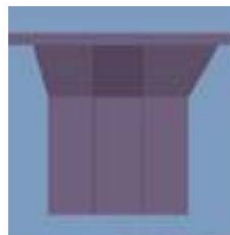

June, 2013

Bourns® Model 3361S Change to the Design Layout for the Carrier Tape

Bourns Trimpot Product Line announces a new design layout for the carrier tape of the Bourns® Model 3361S Square SMD Trimpot® Trimming Potentiometer. This improved design provides a more secure fit for the model and increased stability in the shipping and handling process.

Current Design

Improved Design

The new carrier tape design reflects a change to the fit and form of the product. The phase-in process will begin during the month of August, 2013. The effective date code will read **331C** on the Bourns packaging label.

Implementation dates are as follows:

*Evaluation samples will be available: During the week of **June 23, 2013***

*Date that manufacturing of existing products will cease: **August, 2013***

*Date that deliveries of modified products will begin: **August, 2013***
