MAGNETICS

Bourns® Model PM1608, SDR6603 Series Non-shielded Power Inductors and PM1608S, SRE6603, SRR6603 Series Shielded Power Inductors *Addition of Manufacturing Plant and Change to Manufacturing Process*

Riverside, California – August 24, 2021 – Effective February 20, 2022, an additional plant from one of our existing manufacturing sites in China will produce the Model [PM1608](#) and [SDR6603](#) Series Non-shielded Power Inductors and Model [PM1608S](#), [SRE6603](#) and [SRR6603](#) Series Shielded Power Inductors to help accommodate increasing production demands. A list of affected part numbers is included on page 2.

No changes in design or materials will be made to the inductors manufactured at the new plant. The manufacturing process of the inductors will change from manual to automated at both plants. The form, fit, function, country of origin and production lead time of these inductors will remain the same. The quality and reliability of the components should be improved by the change to an automated manufacturing process.

After February 20, 2022, orders for these model inductors will be filled with inductors manufactured at either plant.

Implementation date is as follows:

Date that production will begin at the new plant: **February 20, 2022**

First date code using the above changes: **2208**

If you have any questions or need additional information, please feel free to [contact Customer Service/Inside Sales](#).

Users should verify that the described changes will not impact the performance of the product in their specific applications.

IC219903
