

Model PTR901 Series Potentiometer with Rotary Switch

Manufacturing Process Change

Riverside, California – September 1, 2022 – Effective immediately, Bourns will start using an automated line assembly process to increase the productivity and quality consistency for its [Model PTR901 Potentiometer with Rotary Switch](#).

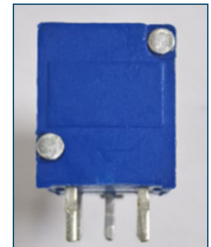

In order to fit the requirements for the new automated assembly, the component's marking position will be slightly modified as depicted below. The electrical and mechanical performance of the product will continue to meet the existing data sheet specifications. The fit, function, and quality of the affected product will remain the same. The reliability should be improved. The form is changed because of the change in the marking position.

Existing Marking Position

New Marking Position

Qualification/test data and evaluation samples are available upon request. Bourns recommends that customers test the affected part number(s) in their specific applications for verification of satisfactory performance.

A list of affected part numbers is provided on the following page.

Implementation dates are as follows:

Date current manual manufacturing process will cease: ***Immediately***

Date delivery of new modified products will begin: ***September 22, 2022***

First date code using above changes: ***2238***

If you have any questions or need additional information, please feel free to contact [Bourns Customer Service/Inside Sales](#).

Users should verify that the described changes will not impact the performance of the product in their specific applications.
