Bourns has completed its evaluation of the alternative materials from the supplier. The fit, form, function, quality and reliability of the affected part numbers will remain the same. The Model MF-FSMF, MF-PSMF, MF-NSMF, MF-USMF, MF-MSMF, MF-SMDF and MF-LSMF Series with the additional PCB process supplier will continue to be RoHS compliant* and halogen free**.

Samples built using the additional PCB process supplier are available upon request. Bourns recommends that customers test the affected part numbers made with the additional PCB process supplier in their specific applications for verification of satisfactory performance.

Implementation dates are as follows:

Date that deliveries of products manufactured from the additional supplier will begin: **November 1, 2024**

First date code from both PCB process suppliers: **4V**

Orders for the affected part numbers received after November 1, 2024, may be filled interchangeably from either the existing supplier or the additional supplier.

If you have any questions or need additional information, please feel free to [contact Customer Service/Inside Sales](#).

Users should verify that the described changes will not impact the performance of the product in their specific applications.
