The form, fit and function of the inductors will not change as a result of this change to the carrier tape. The quality and reliability of the inductors should be improved with the change to the carrier tape. Traceability will be maintained through lot code and date code.

Samples utilizing the above changes are available on request. Bourns recommends that customers test the affected part numbers in their specific applications for verification of satisfactory performance.

Implementation dates are as follows:

Date that manufacturing of existing carrier tape will cease: **January 22, 2024**

Date that deliveries of modified carrier tape will begin: **January 23, 2024**

First date code using the above changes: **2404**
