PCN EIC-1138 Flammability rating (V-0) removal

Detailed Description of Change

Recently, we received a vendor notification, indicating certain mold compounds from their portfolio will require requalification for UL flammability compliance.

As a result, we need to remove the UL 94 V-0 flammability rating from our datasheets for the part numbers listed in the attached document.

We would like to inform you that although components shipped from Littelfuse beginning with date code 2438 are considered to not have a UL 94 V-0 flammability rating, they remain fully compliant with the certifications outlined in their respective data sheets. There are no material changes to the parts affected. No other changes are done to the certificates included in UL files No. E69938 and E174201 or to TUV file No. B 082667 0008.

Form, fit, function changes: None

Part number changes: None

Replacement products: N/A

Last time buy: N/A

Should you have any further inquiries or require additional information, please do not hesitate to reach out to our dedicated customer support team.

The PCN number assigned to this action is **PCN EIC-1138** and must be referenced in any correspondence related to the change.

If you have any other questions or concerns, please contact your local Littelfuse sales representative or Product Manager below for further assistance.
