Subject : Enhanced performance of 242 Fuse Series

With regards to the above reference, Littelfuse has enhanced the robustness of our 242 Fuse Series by adding a silver ring on the fuse body which will enhance the connection between the cap and the body.

What has change?

Below picture shows the before and after comparison.

1. What is maintained?

- a. Fuse part number.
- b. Electrical Characteristics.
- c. Fuse Resistance value.
- d. Fuse Dimension.
- e. Agency Certificate Number.

2. When is the target implementation? This will be a running change and the target implementation date is on January 10, 2022.

Note: All samples request after November 1, 2021 will use the new fuse design.

Best regards,
Daniel Wang
