

Product Change Notification

POWER TVS DIODES

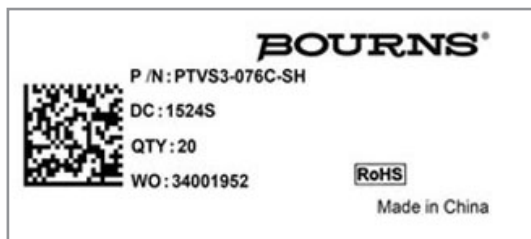

February, 2016

Bourns® Power TVS Diode Product Labels will Include Certified Safety Symbols

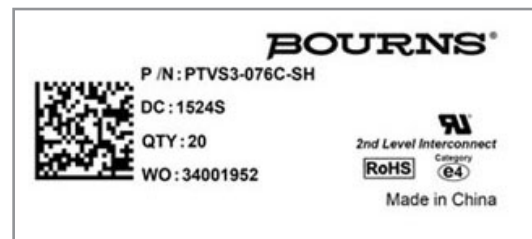

In the spirit of continuous improvement, production labels for Bourns® Power TVS Diodes will include certified safety symbol(s) (e.g., UL, etc.) on the 2D barcodes. The current 2D barcode format includes the part number, quantity, date or lot code, and work order information. The new label, with the certified safety symbols, will provide safety information.

The new label will have no effect on the form, fit or function of the Bourns® products. The manufacturing process remains unchanged and agency certifications are unaffected. Bourns will begin phasing in this process on or about May 1, 2016 on a roll-out basis. Goods manufactured prior to implementation of this label change will continue to be without the safety symbols. A list of the affected part numbers is on the following page.

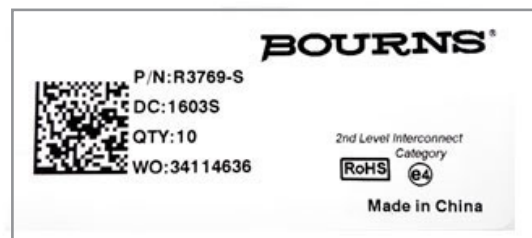

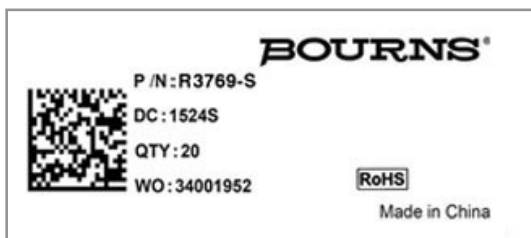

Current Label

New Label with UL symbol

without UL symbol
