Dear Customer,

**Re: Product Change Notification for Harwin product.**

As part of our continuous product improvement program, Harwin has made minor dimensional changes to part number series M50-430xxxx – 1.27mm SMT Female Connector, Archer. This was undertaken to improve the mounting of the connector on the PCB, and consequently improve automatic assembly processing.

The changes involve a few small dimensional changes:

- The location peg lengths have increased from 1.20 to 1.40mm
- The surface where the location peg is attached to the moulding has moved up 0.2mm.
- PCB layout – the dimension between the two rows of pads has increased from 1.50 to 2.00mm.
- The contact point has moved from 1.00 to 1.09 below the mating face.

If you have any further questions regarding this letter, please do not hesitate to contact us.

Yours faithfully,

The Product Management Team
