see attached list of articles:

Article_packing_unit_00.xls

Brief description of the modification 1) 2)
Increase in the packaging quantity

Detailed description of the modification
<p>The articles of the attached list will be delivered in larger packaging units.</p> <p>With this change we want to meet the increased customer demand for larger packaging units. Our environment management is certified according to ISO 14001. With the change of the packaging size, we take account of the idea of environmental protection to save resources and furthermore we significantly reduce the packaging volume and the packaging waste for our customers.</p> <p>All articles, that have the possibility to order a lower purchase order quantity than a complete packaging unit, will keep this option.</p> <p>The new cardboard boxes and plastic bags will furthermore be marked with a colored label ("changed packaging").</p> <p>The technical data of the PCB terminal blocks and headers will not be changed. During the conversion phase, both packaging units will be delivered simultaneously depending on the stock.</p>

Further enclosures:
