2 Type of change

- Extended supply voltage range for the illumination
- Reduction of power consumption
- Improved optical appearance of the illumination

3 Detailed description of change

The LED driver of the ring illumination was changed from series resistor for a fixed supply voltage of 24VDC to a step down converter in constant current mode allowing a supply voltage range from 5VDC to 28VDC.

The new LED driving principle provides improved brightness, homogeneity and power efficiency for all MCS 30 product variants.

4 Reason of change

This change is part of the continuous improvement process.

5 Release date

The change will be rolled-out starting ww 05/2017 (Date code 1705 or higher on label) and lasts approx. 6 months depending on the variant.
