Reason of Change:

- | | |
|---|---|
| <input type="checkbox"/> Technical requirement | <input type="checkbox"/> Change of production process/logistical changes |
| <input type="checkbox"/> Customer requirement | <input type="checkbox"/> Location of production |
| <input checked="" type="checkbox"/> Quality improvement | <input checked="" type="checkbox"/> Other: New SW introduction; EOL of old releases |

Description of change:	<p>Telit Cinterion announces the availability of latest SW version V13-2.4.0 for its GNSS product series: <i>SL871L, SL871, SL869L-V2, SL869-V2, SE878K3-A, SE868K3-A, SE868K3-AL</i>. This software introduces a major fix related to GLONASS week rollover that will occur on the 31st of December 2027 and improves stability for self-generated predictions (i.e., EASY feature).</p> <p>Furthermore, the software commands and functionality (with exception of version string) are backward compatible with previous releases, hence, this change is transparent for customers.</p> <p>For these reasons, we recommend all customers to migrate to the latest release and we declare all previous SW versions (i.e., V13-2.3.4 and older) as EoL(End of Life) with following schedule.</p>
Schedule details:	<p>Built to Order (BTO): June 1st, 2024 From this date, products will be available upon firm order (not cancellable and not re-schedulable).</p> <p>Last Time Buy (LTB): November 31st, 2024 Orders can be submitted until this date.</p> <p>Last Shipment Date (LSD): May 31st, 2025 Date that can be requested for scheduled orders, which were placed before LTB.</p>

Quality assurance measurements:	The new version fulfils all internal test requirements according to our Quality Management process and philosophy.
