| | |
|------------------------------|--|
| Description of Change | End of life for Digi NS9210/NS9215 chips |
|------------------------------|--|

| | |
|--------------------------|---|
| Reason for Change | <p>Digi has been and remains committed to longevity of our embedded product offerings. Unfortunately, Digi has received notification of several end of life (EOL) and last time buy (LTB) components from key suppliers affecting multiple product families.</p> <p>The product families affected include the Digi NS9210/NS9215 chips which were released as Digi products 22 years ago.</p> <p>Digi has worked extensively with our supply partners to enable Digi's end customers with an LTB to provide continued lifetime availability of their products.</p> <p>No direct or functional replacement products are available so participation in the LTB is highly recommended.</p> |
