End of Life Announcement

Dear Madam/Sir,

VARTA delivers innovative products that meet the highest standards in terms of quality and performance, and prides itself in excellent support. For this, we are constantly improving our processes, products and production.

In order to maintain the quality and service that our customers have come to rely on, we will need to adjust our focus. We have therefore taken the strategic decision to prioritise certain elements of our portfolio, while we will unfortunately have to part with others.

After thorough consideration and business analysis, we have come to the conclusion that for the above reasons, we can no longer support the products and VKBs according to the attached list. We are aware that this decision could impact the progress of your project, and we are sorry that the circumstances do not allow us to pursue the project activities for the moment. We hope for your understanding.

As last time buy and last time shipment for the CoinPower products according to the attached list, the following deadlines apply:

- Last time buy: September 30, 2024
- Last time delivery (ETD respective VARTA plant): January 31, 2025

We will ensure a good transition and will remain at your service for any questions during this period. Please feel free to contact your VARTA sales representative at any time. For any potential future projects, VARTA remains available and keen to understand your needs.

Best regards,

VARTA Microbattery GmbH
