

PFAS Statement

PFAS (Per- and polyfluoroalkyl substances)

Per- and polyfluorinated alkyl substances (hereafter abbreviated as PFAS) are a group of extremely persistent chemicals that are used in many consumer products.

PFAS are used in products because they can, for example, increase oil and water repellence or withstand high temperatures. Currently, there are more than 4700 different PFAS that accumulate in humans and the environment.

Cambion Electronics LTD hereby declares that, to the best of our knowledge, our products do not contain PFAS.

We have undertaken due diligence with our suppliers to ensure that Cambion Electronics LTD does not directly purchase any PFAS.

Our products have been manufactured without the intentional use of PFAS.

Cambion Electronics Ltd makes no warranties, expressed or implied and assumes no third-party liability in connection with any use of the information in its statements of compliance.
