### **Anglia extends electromechanical portfolio with Bulgin distribution agreement**

Anglia has announced that it has signed a UK and Ireland distribution agreement with connector and emech manufacturer Bulgin.

The Bulgin product range includes IP68 'Buccaneer' waterproof connectors, IEC connectors and cord sets, 'Polysnap' mains inlet modules, as well as a range of battery and fuse holders, EMI filters, indicators and vandal resistant security switches.

"The name Bulgin is synonymous with high performance connectors for use in challenging environments, and we expect it to be a great asset to us to be able to include these world-class components in our product offering," said Anglia's Sales Director Jim Ward.

Commented John Jonas, Distribution Sales Manager for Bulgin, "Anglia has particularly impressed us with their strong design-in capabilities, along with their excellent reputation for customer service. The way in which they balance their portfolio - to offer complementary rather than competing products - is also very appealing to us."

**About Anglia**

Anglia is a leading franchised distributor of semiconductors, optoelectronics, interconnect, and passive and electromechanical components. Anglia stocks over 500 million components from 250,000 product lines in the UK. Components from every supplier are stocked in depth and breadth for same-day despatch. Anglia aims to streamline logistics and reduce customers' transaction costs through services that include KAN-BAN, EDI, and customer-dedicated inventory. Accurate, on-time delivery performance is over 99% and rising.
