## 116-page data book details thousands of frequency control products

Just published by Anglia, the 116 page "Frequency Data Book" describes a host of frequency generators, filters and saw devices in depth. Full data sheets are included for thousands of products including ceramic resonators, crystals, femto clocks, varactor and voltage controlled oscillators, temperature and oven controlled oscillators, and real time clock modules. The data book also covers ceramic, monolithic and SAW filters, plus SAW resonators and ceramic discriminators.

A clearly indexed product overview makes it easy to select products from Murata, Micro Crystal, NDK, IDT, EPCOS and Hudson.

All data is illustrated with full colour photographs and dimensioned package outlines.

About Anglia

Anglia is a leading franchised distributor of semiconductors, optoelectronics, interconnect, and passive and electromechanical components. Anglia stocks over 500 million components from 240,000 product lines in the UK. Components from every supplier are stocked in depth and breadth for same-day despatch. Anglia aims to streamline logistics and reduce customers' transaction costs through services that include KAN-BAN, EDI, and customer-dedicated inventory. Accurate, on-time delivery performance is over 99% and rising.
